

I am opposed to HB 4026 and urge all of my elected representatives to oppose it as well. For Congress to limit the type of programming that satellite radio or any radio or tv programming would be a violation of our freedom of speech. It is one thing to limit due to public decency and to protect our youth from hearing or seeing indecent things but to limit things such as traffic information and weather information? Come on! This bill appears to me to be a blatant attempt to limit competition and have Congress be the agent to make that happen. Dont be used and dont allow us the People to loose any more freedoms.....Herb Pearson
